

ICE.Net

Automation and Control of Ice Load Transactions

THE SOLUTION TO AUTOMATE AND CONTROL ICE LOADING TRANSACTIONS

Automated system for dispatching ice in fish markets. Suitable for use with belt scales and platform scales. User-friendly graphic interface including bus communications and a wide range of peripherals providing the best solution for your needs.

YOUR ICE SUPPLY MADE EASY

FRIENDLY TECHNOLOGY FOR ICE DISPATCH IN FISH MARKETS

Our automated system uses devices that are easy to handle. This enables fast and efficient ice dispatch, improving operations in the fish market.

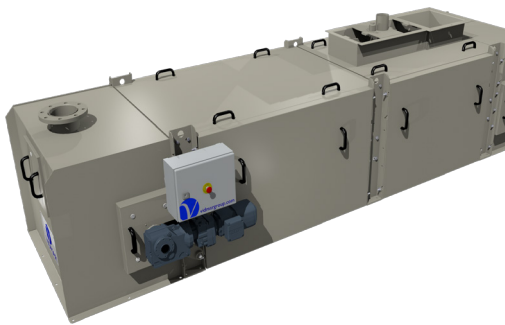

EXPEDITION AND SUPPLY MANAGEMENT

Our software Ice.Net, manages ice requests in self-service mode through one or more dispatch cabinets and in direct communication with the program installed in a PC.

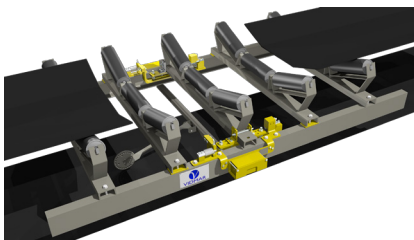

Furthermore, Ice.Net stores the data of each supply, offers a variety of reports and leaves the information available in the customer's ERP.

**FLEXIBLE WITH ANY WEIGHING SYSTEM**

Our technology characterizes for its adaptability of our devices to the needs of any Fish Market allowing different weighing systems to be configured:

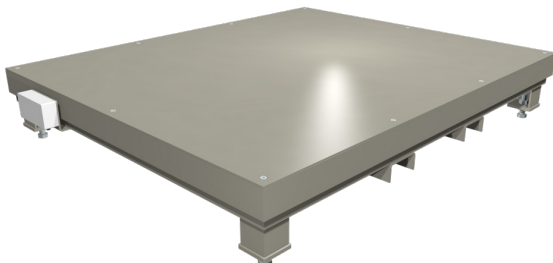

**- Belt weigh feeder & dosing controller:**

A full choice to renew weighing and transport systems. Scale with different belt widths according to client's needs and built in stainless steel for saline environments

**- Belt Scale & controller:**

The best option to integrate our equipment in existing facilities.

Our Belt Scale will improve weighing process of ice dispatch.

**- Weigh platform for static applications:**

Precise and convenient alternative for weighing produce.

VIDMAR GROUP – LONG HISTORY COMPANY WITH PROVEN EXPERIENCE

With more than 30 years of experience, VIDMAR has turned into a GLOBAL leading company with its own technology in industrial weighing and process automation. Our highly capable IT department develops the tools needed to coordinate data collection and data processing.
